

The Standard

v1.0 · Effective June 2026

SCOPE

What the **Standard** governs.

Applied before any record is finalized.

Applies to documentation used as the basis for decisions.

Applies to the reasoning that becomes part of the record.

CONTEXT

Why the **Standard** exists.

AI-assisted documentation introduces evidentiary risk.

FAILURE

Not a strong cultural fit cannot be evaluated independently.

Stand on its own.

Be based on something observable.

Be clearly explainable.

If it does not stand on its own, do not finalize it.

THE CHECK

Does it stand on its own?

What is it based on?

Would someone else understand it without context?

If not, do not finalize.

VERIFICATION

Forensic Redlines.

What the difference looks like in a real record. Before language does not satisfy the Standard. Revised language is grounded in observable criteria. Identification of phrasing does not constitute a determination of unlawfulness.
