

FINAL ENGAGEMENT.HTML REMEDiation AND VERIFICATION REPORT

Date: 2026-09-05 **Scope:** one page — engagement.html. One correction pass, one live verification, no other website changes.

1. EXECUTIVE VERDICT

VERDICT A: CORRECTION AND LIVE VERIFICATION COMPLETE

engagement.html was corrected, committed as 40d14bb, merged as 7fdc8eb, deployed, and directly verified against the live production response body at https://www.jrsstandard.com/engagement.html. The live body is byte-identical to origin/main at 36,913 bytes.

Every active founder-service pathway is gone: zero class="cta-primary" elements, zero mailto: links carrying a subject= parameter, zero forms, zero buttons, zero inputs. The historical record is intact: the three-row fee table, the Data Isolation Guarantee, the data-handling section and all four research figures survive. The page shrank by 150 bytes, which is the two removed links.

No public website file other than engagement.html was modified by this task.

2. BASELINE

Item	Value
Starting branch	claude/html-pilot-L8rC3
Starting HEAD	092609e44539b96698f0be5497f89c0801032e78
origin/main at start	6e377fd58d71b25a81e3868335ebd79bcd4597a
Working tree	clean, 0 entries
engagement.html on the production branch	present, 37,063 bytes; local copy byte-identical to origin/main

3. BASELINE FINDINGS

Every active or potentially active founder-service element found before correction.

Action elements

Element	Detail
mailto: links	3 total, 2 with pre-filled subject= and body= fields
class="cta-primary" anchors	2
<form> / <button> / <input>	0 / 0 / 0

CTA 1, line 273: Book a twenty-minute record read → → mailto:info@jrsstandard.com?subject=Twenty-minute%20record%20read&body=Record%20type%3A%0ATimeframe%3A%0ATwo%20or%20three%20times%20that%20suit%20yc

CTA 2, line 281: Request scope and invoice → → [mailto:info@jrsstandard.com?](mailto:info@jrsstandard.com?subject=Engagement%20scoping&body=Record%20type%3A%0AApproximate%20volume%3A%0ATimeframe%3A%0APurchase%20)
subject=Engagement%20scoping&body=Record%20type%3A%0AApproximate%20volume%3A%0ATimeframe%3A%0APurchase%20

Present-tense language implying current availability

Location	Wording
Lede, line 192	"How an engagement works ."
Line 194	" This page exists to be forwarded . If you are considering a record-defensibility review, your procurement team and your counsel will want the fee basis..."
Line 220	"Every engagement is fixed fee, agreed in writing before any work begins . There is no hourly rate..."
Line 231	" Invoiced on agreement. Purchase orders accepted . Payment terms are net 30 unless your procurement process requires otherwise..."
Line 264	" Engagements are not subcontracted ."
Heading, line 266	"Before you commit anything"
Line 268	"...it is not a discovery call. Send one de-identified record... You see exactly what a finding looks like... before deciding whether to pay for four more ."
Line 270	"...the record is deleted when the call ends ."
Heading, line 276	"Starting"
Line 278	" Email with your record type... You receive scope, the fixed fee, turnaround and an invoice in one reply, within one business day . No discovery call is required..."
Line 284	" Not ready for that? The seven-point record check is public..."
Status strip, line 287	"...these engagements are being tested through controlled market experiments. You would be among the first ..."

Term counts at baseline

Book 1 · Request 9 · Scope 16 · Invoice 3 · Purchase 2 · Start 3 · Contact 0 · Schedule 0 · Engagement 14 · Turnaround 2 · Fee 11 · Pricing 1 · Available 1 · "being tested" 1 · currently 0 · "are performed" 0 · "are not subcontracted" 1

4. EXACT CORRECTIONS MADE

Fourteen edits, all within `engagement.html`.

ID	Original	Corrected	Reason	Classification
C-1	<h1 class="lede">How an engagement works.</h1>	How an engagement worked.	Present tense framed the page as a live offer sheet	Tense
C-2	"This page exists to be forwarded. If you are considering a record-defensibility review..."	"This page is retained as a historical record of the former engagement model. While the pathway was open, a procurement team or counsel evaluating a record-defensibility review needed... The engagements themselves are closed to new requests."	The page invited a live procurement evaluation	Archival reframe
C-3	"Every engagement is fixed fee, agreed in writing before any work begins ..."	"Every engagement was fixed fee... before any work began ..."	Fee basis stated as a current offer	Tense
C-4	" Invoiced on agreement. Purchase orders accepted. Payment terms are net 30..."	" Invoicing followed agreement of scope, and purchase orders were accepted. For engagements agreed in writing before 4 September 2026, payment terms are net 30..."	Payment terms read as currently available; now scoped to pre-existing engagements	Tense + scoping
C-5	"Engagements are not subcontracted."	"Engagements were performed personally and were not subcontracted."	Implied ongoing delivery	Tense
C-6	Before you commit anything	How the introductory record read worked	Heading addressed a prospective buyer	Archival reframe
C-7	"...it is not a discovery call. Send one de-identified record... You see ... before deciding whether to pay for four more ."	"...it was not a discovery call. A client sent one... so they saw ... before deciding whether to pay for four more."	Second-person instructions to act now	Tense + person
C-8	"...the record is deleted when the call ends ."	"...the record was deleted when the call ended ."	Describes a live process	Tense
C-9	The Book a twenty-minute record read → CTA block	"This pathway is closed. Neither the record read nor a scoping request can be initiated from this page."	An actionable booking link on a closed page	CTA removal
C-10	Starting	How an engagement started	Heading invited initiation	Archival reframe
C-11	" Email with your record type... You receive scope, the fixed fee, turnaround and an invoice in one reply, within one business day. "	" A client emailed their record type... Scope, the fixed fee, turnaround and an invoice came back in one reply, within one business day."	A direct promise of scope, fee, turnaround and invoice to a current visitor	Tense + person
C-12	The Request scope and invoice → CTA block	(removed)	An actionable scoping-and-invoice link with pre-filled procurement fields	CTA removal
C-13	"Not ready for that? The seven-point record check is public..."	"The seven-point record check remains public... It is open now and is the place to start."	The framing presupposed the reader was choosing between a purchase and the free check	Reframe
C-14	"...these engagements are being tested through controlled market experiments. You would be among the first ..."	"While this pathway was open... these engagements were being tested ... That was stated at the time... The pathway is now closed. "	Stated the engagements were currently under commercial test	Tense

5. SCOPE CONTROL

Files modified by this task, from `git diff --name-only 6e377fd 7fdc8eb`, attributed by the commit that introduced each:

File	Introduced by	This task?	Deployed?
<code>engagement.html</code>	40d14bb	YES — the authorized target	Yes
<code>scripts/apply_engagement_archival_2026-09-05.py</code>	40d14bb	YES — the deterministic applier	No — <code>scripts/</code> excluded by <code>.vercelignore</code>
<code>research/MASTER_TRACKER.md</code>	40d14bb	YES — log entry only	No — <code>*.md</code> excluded
<code>FINAL_INDEPENDENT_FULL_SITE_AUDIT_2026-09-05.md</code>	092609e	NO — pre-existing branch commit, carried into <code>main</code> by this merge	No — <code>*.md</code> excluded
<code>research/FINAL_SURGICAL_CORRECTION_REPORT_2026-09-05.md</code>	bf7407c	NO — pre-existing branch commit, carried into <code>main</code> by this merge	No — <code>*.md</code> excluded

Confirmation: no public website file other than `engagement.html` was modified by this task. The two `.md` reports appear in the merge range because they were committed to the branch in earlier turns, at the repository stop hook's instruction, and this PR carried them to `main`. They are reporting artifacts, excluded from deployment, and are distinguished here from changes made by this remediation as the protocol requires.

`git diff --name-only` at the working-tree stage returned `engagement.html` and nothing else.

6. TEST RESULTS

Metric	Value
Total checks	123
Passed	122
Failed	0
Skipped	1 (not reachable, not drift)
Guards modified	NONE

Two gates in my own applier were wrong and were narrowed rather than disabled. Neither is a repository guard; both are refusal conditions inside the one-shot script.

- Banning the bare string `cta-primary` also matched four CSS rule declarations and the shared mobile tap-target rule, so the script refused on a false positive. Narrowed to `class="cta-primary"`, the element usage.
- Comparing every numeric token on the page failed, because removing two `mailto:` links deletes their percent-encoded sequences (`%20`, `%3A`, `%0A`) and the new wording adds a date. Narrowed to the figures that actually matter: `83.9%`, `72.7 to 95.1`, `384 graded reads`, `95% confidence interval`, `completers_detection`, `net 30`.

7. GIT RESULTS

Item	Value
Commit SHA	40d14bbf2c5a6af77a6600dbc833c25a48a3b4a3
Push	YES — 092609e..40d14bb
Pull request	#17, mergeable_state: clean
Merge	YES
Merge commit	7fdc8eb5dede1239b53440f8e1d537f9989cd9ab
Production commit	7fdc8eb, and origin/main contains 40d14bb

Live on the second poll; poll 1 returned the pre-correction 37,063 bytes.

8. LIVE VERIFICATION RESULTS

Production URL reviewed: <https://www.jrsstandard.com/engagement.html>

Category	Result	Evidence		
A. Access	PASS	HTTP/2 200, content-type: text/html; charset=utf-8, 0 redirects, 36,913 bytes		
B. Archival status	PASS	"Closed to new requests" 1 · "These reviews are no longer offered" 1 · "retained as a historical record of the former engagement model" 1 · "This pathway is closed" 1 · "The pathway is now closed" 1		
C. Active service pathway	PASS	Book 0 · "Book a" 0 · "Request scope" 0 · "Request an" 0 · "Get scope" 0 · "Get an invoice" 0 · "you will receive" 0 · "you will get" 0 · "available now" 0 · "You receive scope" 0 · "Engagements are not subcontracted" 0. Three residual matches classified in section 9		
D. CTA test	PASS	class="cta-primary" 0 · mailto: with subject= 0 · <form> 0 · <button> 0 · <input> 0. The single remaining mailto: token is inside a telemetry regex (mailto:\	tel:\	javascript:), not a link. All 13 remaining anchors point to review-engine.html , enterprise.html#enterprise-inquiry , investigator-guides.html , training.html , check.html , terms.html , org-pilot.html` or the page itself — none is a founder-service intake mechanism
E. Discoverability	PASS	Live <meta name="robots" content="noindex,nofollow"> · live sitemap.xml contains engagement.html 0 times · zero inbound links from any non-retired page in the repository at origin/main		
F. Archival content	PASS	All three fee-table engagements present; Data Isolation Guarantee 1; "ephemeral working memory" 1; 83.9% 1; 72.7 to 95.1 1; 384 graded reads 1; pre-registered analysis plan 1; "Five working days" 1; "Ten working days" 1. 36,913 bytes — a 150-byte reduction, not an emptying		
G. Production match	PASS	Byte-level comparison performed. cmp between the fetched body and git show origin/main:engagement.html : byte-identical, 36,913 bytes		

9. REMAINING ACTIVE-SERVICE LANGUAGE

Every live phrase that could arguably imply a current founder-delivered service. Nothing ambiguous is hidden.

Phrase	Count	Context	Classification	Reasoning
turnaround	1	Fee-table column header: "Engagement / Fee / Turnaround"	Archival	A column heading over three rows whose action cell reads "Closed". The table is the historical record the protocol directs be preserved
turnaround	2	"...Scope, the fixed fee, turnaround and an invoice came back in one reply, within one business day."	Archival	Past tense, under the heading "How an engagement started", immediately below "This pathway is closed. Neither the record read nor a scoping request can be initiated from this page."
being tested	1	"While this pathway was open, commercial demand had not been established and these engagements were being tested through controlled market experiments. That was stated at the time... The pathway is now closed."	Archival	Explicitly bounded to the period when the pathway was open, and closed by the following sentence
Engagement terms	1	Related-links nav, a self-link to engagement.html	Neutral	A label on the archival page's own entry in a link row
enterprise inquiry	3	Links to enterprise.html#enterprise-inquiry	Irrelevant	The live licensing, technical-integration and acquisition pathway, which is the intended destination
Fee / Fees	11 → present	Fee-table header and the historical fee paragraph	Archival	Now reads "Every engagement was fixed fee... before any work began"

No phrase on the live page classifies as active.

One observation, out of scope

OUT OF SCOPE. NOT MODIFIED. The four .cta-primary CSS rules in this page's inline <style> blocks are now unused by any element on the page, since both anchors that used the class are gone. Removing them would be an unrelated edit under this pass's scope control. This conflicts with the CLAUDE.md rule requiring orphaned CSS to be removed when encountered; the scope control is the more specific and more recent instruction, so the rules stand and are reported rather than silently deleted.

10. ARCHIVAL INTEGRITY

The page now functions coherently as a historical record. Read top to bottom on the live body:

1. **"Closed to new requests"** — "These reviews are no longer offered. JRS is maintained as an independently usable methodology and an intellectual-property asset, not as a review service, and nothing on this page is open for a new request."
2. **"How an engagement worked."** — "This page is retained as a historical record of the former engagement model. While the pathway was open, a procurement team or counsel... needed the fee basis, the data handling, and who owned the output. All three are recorded below. The engagements themselves are closed to new requests."
3. **Fees, the three-row table, data handling, ownership** — preserved, in the past tense, with every historical figure intact.

- 4. "How the introductory record read worked" — "Twenty minutes, no charge, and it was not a discovery call. A client sent one de-identified record in advance..."
- 5. "This pathway is closed. Neither the record read nor a scoping request can be initiated from this page."
- 6. "How an engagement started" — "A client emailed their record type... Scope, the fixed fee, turnaround and an invoice came back in one reply..."
- 7. "Operational validation." — "While this pathway was open... The pathway is now closed."
- 8. A live onward path — the seven-point record check "remains public and ungated... It is open now and is the place to start", and the related-links row points to the Review Engine API, the enterprise inquiry and the Mini-Pilot.

The page is neither broken nor emptied. It explains what the offering was, what it cost, how records were handled and who owned the output, and states four times over that it is closed.

11. OUT-OF-SCOPE FILE INTEGRITY

Comparing `origin/main` before this task (6e377fd) with `origin/main` now (7fdc8eb):

File	Status
<code>index.html</code>	UNCHANGED
<code>enterprise.html</code>	UNCHANGED
<code>review-engine.html</code>	UNCHANGED
<code>research.html</code>	UNCHANGED
<code>pilot.html</code>	UNCHANGED
<code>training.html</code>	UNCHANGED
<code>terms.html</code>	UNCHANGED
<code>audit-request.html</code>	UNCHANGED
<code>governance-request.html</code>	UNCHANGED
<code>calibration-request.html</code>	UNCHANGED
<code>sitemap.xml</code>	UNCHANGED

Also unchanged by this task: `research-summary.html`, `results.html`, `finding.html`, `evidence-ledger.html`, `datasets.html`, `codebook.html`, `questions.html`.

The two `.md` reports that appear in the merge range were introduced by **pre-existing branch commits** `bf7407c` and `092609e`, not by this task, as attributed in section 5.

12. FINAL DECLARATION

- 1. **engagement.html corrected:** YES — 14 edits, 37,063 → 36,913 bytes.
- 2. **Correction committed:** YES — `40d14bbf2c5a6af77a6600dbc833c25a48a3b4a3`.
- 3. **Merged:** YES — `7fdc8eb5dede1239b53440f8e1d537f9989cd9ab`, PR #17.
- 4. **Deployed:** YES — production commit `7fdc8eb`; live on the second poll.
- 5. **Live production page directly inspected:** YES — `https://www.jrsstandard.com/engagement.html` retrieved by `curl`, body written to disk, all findings read from the saved file, and byte-compared against `origin/main` with `cmp`.
- 6. **Any active founder-service pathway remaining:** NO. Zero `class="cta-primary"` elements, zero `mailto:` links with a `subject=` parameter, zero forms, zero buttons, zero inputs. All three residual keyword matches classify as archival and are set out in section 9.

7. **Any other website changes made: NO.** The only public website file modified by this task is `engagement.html`. The other files in the merge range are non-deployed reporting artifacts and a one-shot script, two of which predate this task.
