

JUSTIFICATION REVIEW STANDARD

Certificate of Recognition

This certifies that

Ubayet Hossain, FRM

was named the recipient of the Global Governance and Transparency Honor (2026), named for the methodology rather than for a completed review, in recognition of designing the validation methodology on which this programme rests: the reference-panel design, the chance-corrected reliability framework, and the acceptance thresholds fixed in advance of any analysis. That work decided what the study would accept as evidence before it knew what the evidence would say, which is the part of a validation that has to be settled first and is hardest to add afterwards. He is the author of that methodology and a co-author of the paper that reports it.
